

Press Release

TopoSys GmbH Relocates to New Premises

TopoSys GmbH, Ravensburg, Germany, will be relocating its entire operations on 15.03.2004. The new domicile of the company will be Biberach, Germany. This step was prompted by the constantly expanding order volume in the sale of services involving TopoSys sensors.

The move will put TopoSys in the vicinity of the well-developed Biberach airport, only 10 minutes away, which will be used intensively for the company's flight operations. The relocation of TopoSys secures simple and flexible access to the airport as well as optimization of the flight costs.

TopoSys will be flying missions from Biberach with aircraft and helicopters across Europe, almost daily, for the acquisition of high-precision data by customer order using the TopoSys "Falcon" Lidar systems. In addition to the acquisition of elevation data by means of Lidar, the importance of acquiring RGB/NIR data by means of the integrated line scanner is gaining in momentum.

The new contact data from 15.03.2004:

TopoSys Topographische Systemdaten GmbH
Obere Stegwiesen 26
88400 Biberach
Germany
Tel.: +49 (0)7351 / 4 74 02 - 0
